Career Objective

Third-year student at the Faculty of Computers and Artificial Intelligence, Beni-Suef University, seeking an internship or entry-level opportunity in Data Analysis, Machine Learning, or Artificial Intelligence. Interested in using Python, data analysis, statistics, and machine learning techniques to solve real-world problems. Currently developing practical and professional skills through the Digital Egypt Pioneers Initiative (DEPI) Junior Data Analyst track and academic projects.

Education

Beni-Suef University

Faculty of Computers and Artificial Intelligence

Bachelor's Degree in Computers and Artificial Intelligence

Beni-Suef, Egypt

Third Year

Experience

Digital Egypt Pioneers Initiative (DEPI)

Junior Data Analyst Track

Egypt

- Developing practical skills in Data Analysis and data-driven problem solving.
- Working with concepts related to data cleaning, data quality, and Exploratory Data Analysis (EDA).
- Developing technical, English communication, presentation, and professional skills.
- Participating in practical activities and project-based learning.

Courses and Certificates

- **Cisco Certified Support Technician (CCST) Networking** – Cisco May 2026
- **Data Fundamentals** – IBM SkillsBuild August 2026

Skills

Programming:	Python, C++
Data Analysis:	Data Cleaning, Exploratory Data Analysis (EDA), Data Quality, Statistics, Data Visualization
Machine Learning & AI:	Machine Learning, Supervised Learning, Predictive Modeling, BFS, DFS, UCS, A*
Libraries & Tools:	NumPy, Matplotlib, Microsoft Excel, Git/GitHub, Cisco Packet Tracer
Other:	Data Structures, Computer Networks, Problem Solving, Teamwork, Communication, Presentation Skills

Projects

Predictive Maintenance using Machine Learning

- Developed a Machine Learning project for predicting machine failures before they occur.
- Performed data preprocessing and Exploratory Data Analysis on machine operational data.
- Applied Machine Learning techniques to identify patterns related to machine failures.
- Analyzed model results to support predictive maintenance decisions.

AI Maze Solver

- Developed a Python-based Artificial Intelligence maze-solving project.
- Implemented BFS, DFS, Uniform Cost Search (UCS), A* Manhattan, and A* Euclidean algorithms.
- Compared algorithms based on path length, explored nodes, and execution time.
- Used NumPy and Matplotlib for data processing and visualization.

Computer Networks Project

- Designed and configured a computer network using Cisco Packet Tracer.
- Worked with routers, switches, VLANs, DHCP, and IP addressing.

Data Structures Projects

- Implemented Linked Lists, Stacks, Queues, Trees, Heaps, Graphs, Hashing, and AVL Trees using C++.
- Applied graph algorithms including Dijkstra's algorithm.

Extracurricular Activities

- Participating in the Digital Egypt Pioneers Initiative (DEPI) Junior Data Analyst track.
- Participating in technical training, team-based projects, presentations, and professional skills activities.
- Continuously developing technical and analytical skills through academic projects and self-learning.
